

SADDLE STAND

Keep your tack room tidy with these quick and easy saddle stands. This is easily adaptable, so feel free to make any adjustments to make them fancier.

YOU WILL NEED:

- 3x popsicle sticks
- Hot glue gun
- Craft knife

1. Cut the top 1/3 off 3 popsicle sticks, to form the main shape of the stand
2. Cut a small piece of popsicle stick with angled edges (see pictures) to hold the shape of the stand
3. Glue the 1/3 sticks onto the small angled piece above, one by one, until you have your main shape
4. Now it's time to make the legs. Cut two short pieces of popsicle sticks to be your legs, these can be longer or shorter depending on how tall you want your stand to be.
5. Cut 2 more small angled pieces, to be your feet on your stand.
6. Glue the pieces to the bottom of your legs
7. Glue your legs onto the bottom of your stand. Use a lot of glue, and make sure they are straight from all angles
8. You are finished! Stack on your saddles 😊
