8/9/18

WASH BOTTLES

This week I'll show you how to make some shampoo bottles for your horses! Here I make a shampoo bottle, but you can also make hoof oil, mane/tail dye and heaps more!

You will need:

- Hot glue gun
- Paper (coloured if you want)
- Baking paper
- Tape
- Pens/coloured pencils

1. Make a tube out of the paper, as long and wide as you want your bottle to be, and tape it into place
2. Make a roll of baking paper roughly the same size, but don't tape it.
3. Place the baking paper tube inside the paper tube and let it uncurl to fit the paper tube
4. Fill the tube/s with hot glue, and let the glue fill to the bottom. Let the glue dry.
5. While the glue dries, design your label. Measure a piece of coloured paper to the same height as your bottle and cut the paper so size
6. Draw your label. Make sure to include a logo and a name!
7. Unwrap your bottle. Peel off the tape, and the papers should come off easy
8. Tape your label to the bottom
9. Finished!
